

“

"Hi, I'm Brooke and I am currently in year 7. My transition to KLB was great! KLB has provided me with so much support towards my learning, especially maths. They have grown my confidence and have given me amazing support.

When I first started at KLB I didn't really understand maths very much and found this work very tricky. KLB soon recognised that I was struggling and arranged for me, and a small group of others who also found maths challenging, to have some extra support throughout the week. The Teaching Assistant has been fantastic! She really understands me and what I find difficult and has worked with me to get better and get a grasp of maths. We go at a speed to suit me and she makes sure that everything we cover is relevant and helps me with my normal maths work. KLB are brilliant at recognising when things are challenging and will put strategies in place to support you with this and help you to understand and progress."
